9 KPK Mansehra, Pakistan

EDUCATION

MATRIC (Engineering)

Iqra Collegiate School & Girls college
Mansehra

09/2019 - 05/2021 Mansehra, Pakistan

FSC (Pre-Engineering)

Royal College of Sciences Mansehra

09/2021 - 05/2023 Mansehra, Pakistan

Bachelor In Software Engineering

Hazara University Mansehra

2023 - 2027 Mansehra, Pakistan

SKILLS

Flutter Python Dart Google Firebase REST

Python Scripting Django Agile

Microservices Tkinter SQLite Modular

HTML CSS Django MySQL

CERTIFICATIONS :

IBM (SOFTWARE ENGINEERING)

CODEMATICS URAAN (FLUTTER

DEVELOPER

PROJECTS

Shop Management System

Shop Management System using Flutter and
Firebase

- Designed and developed a shop management system with advanced features using Flutter
- Integrated real-time data processing and offline functionalities

MMC Transport App: Freelance

Designed and developed a comprehensive transport management mobile application using **Flutter** and **Dart** for real-world client operations.

Integrated robust state management and location-based features to optimize fleet scheduling and routing efficiency.

SUMMARY

I am a Flutter Developer and a software engineering student with a solid foundation in Dart, REST APIs, and Python scripting. I have successfully built scalable mobile applications and web projects with a focus on clean architecture and efficient user experiences. I aim to leverage my skills in software development and contribute to innovative projects

EXPERIENCE

Software Developer | Petalnex Ltd Months (Dec 2025- 12/2025 - 03/2026
March 2026) | On-site

Personal Project Mansehra, Pakistan

- Built cross-platform Flutter apps with Firebase, REST APIs, and modern state management
- Developed business-style UI (Vyapar/POS) with PDF and billing features, charts, and offline storage
- Designed and engineered a Snooker Club Management G Booking System using Flutter, integrating high-performance Node.js APIs via the Dio package.
- Developed a scalable Visage Management System focusing on clean UI architecture and efficient state management.
- Re-architected a Clinic/Doctor Appointment System using Django (MVT pattern), incorporating secure user authentication, multi-role dashboard scheduling, and responsive web design.

Full-Stack Developer (Flutter & FastAPI) | Devnox 03/2026 - Present

Mansehra, Pakistan

- Developed a full Python-based desktop store management system with Tkinter and SQLite
- Architected and maintained cross-platform internal products and client applications using the Flutter framework.
- Engineered highly optimized, secure, and asynchronous RESTful APIs using Python (FastAPI) to handle high-concurrency backend logic.
- Managed end-to-end database integration and synchronization utilizing modern data layers like MySQL, Supabase, and MongoDB.
- Implemented complete inventory modules including items, stock, sales, and purchases
- Integrated low-stock alerts and daily reports with optimized modular backend logic

Web Developer

For University

- Built a full Clinic Appointment System using HTML/CSS/JS and Django
- Included patient login, doctor scheduling, online appointment booking, and status tracking
- Applied responsive UI design and clean MVT architecture using Django ORM
